EDUCATION

Bachelor of Technology, Computer Science & Engineering 2024 – 2028
ITS Engineering College, Greater Noida (Dr. A.P.J. Abdul Kalam Technical University) | CGPA: 7.0 / 10

EXPERIENCE

Software Development Intern | Privault.AI 15 Jun 2026 – 31 Jul 2026
AI-powered Privacy & DPDP Compliance Platform

- Built and shipped the company's official website using React, TypeScript and Tailwind CSS, fully responsive from mobile to desktop.
- Developed frontend modules for Consent Management, Data Discovery & Classification and the Compliance Dashboard of the DPDP compliance platform.
- Debugged and optimized existing components, fixing UI inconsistencies and improving application responsiveness.
- Worked in an agile engineering team using Git-based version control, code reviews and sprint planning.

PROJECTS

Pravaah AI – Crowd & Traffic Command Platform (TechTrix) Python · PyTorch · YOLOv8 · Flask · React

- Built a real-time platform that turns multi-camera video and venue floorplans into live green/yellow/red zone density heatmaps using YOLOv8n detection and OpenCV.
- Trained a 2-layer PyTorch LSTM on ShanghaiTech video data to forecast zone congestion 3–5 cycles ahead and raise early alerts.
- Developed a Flask REST/MJPEG backend and React dashboard with operator approval of AI recommendations and Telegram dispatch to field teams.
- Shipped a QR-accessible mobile attendee app via a Cloudflare tunnel with live GPS and routing that re-plans when a zone turns red.

AI Recipe Recommender Python · FastAPI · React · SQLite

- Built a full-stack app that recommends recipes from a user's available ingredients, with a FastAPI REST backend and React frontend.
- Designed the relational schema with SQLAlchemy, so the app can move to PostgreSQL or MySQL by changing one configuration setting.

Urban Guardian React · Node.js · Google Maps API

- Developed a personal safety platform with SOS alerts and live location sharing using the Google Maps API for real-time tracking.
- Built a responsive frontend that handles continuous location updates with minimal latency.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Vite, Responsive Design, Component Architecture
Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, SQLAlchemy
AI / ML: PyTorch, YOLOv8, OpenCV, LSTM
Databases: MySQL, PostgreSQL, MongoDB, SQLite
Tools & Cloud: Git, GitHub, Docker, AWS, Linux, Postman, VS Code, Figma
Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP, System Design

LEADERSHIP

- **Team Leader** across multiple hackathons, leading teams from idea to working prototype and demo.
- **Smart India Hackathon Coordinator** – coordinated planning, participants and event management.
- **Freshers' Event Coordinator** – led teams and on-ground execution for the incoming-student event.

CERTIFICATIONS

- AWS Certified Cloud Practitioner | Developing Modern Applications with AWS AI and Generative AI Services (Jul 2026)
- Full Stack Engineering Program | Data Structures & Algorithms with C | JavaScript Certification
